

Limit Switch Box

Product Selection Simplification Program

Limit Switch Box Color

We have historically pushed on the market a dual colour platform for weatherproof and Exia limit switch boxes WP applications → Black

Exia applications → Blue

There is no mandatory requirement to force Blue colour into hazardous applications, furthermore, facing an extremely demanding market in term of responsiveness and cable entries offering, we decided to standardize to black coating.

This will increase our supply performances being more reactive to market flexibility requirements.

Safety Integrity Level (SIL)

SIL approval (up to SIL3 level) is available as standard for all above certifications, depending on selected switches.

Wiring Terminals

Saying that, user will always get the best technical solution but keeping control of things that matter.

As example there will be control of extra terminal for an internal solenoid wiring, but relieving stress from the unnecessary ones, such as terminals colour.
